

Mine Site Solutions

Heavy Haul Rail Crossing, Australia - Super-Cor® Arches

Haul Road Crossing, Liberia - Prefabricated Bridge

Crusher Wall, USA - MSE Retaining Walls (Wire Walls)

Your global portal to infrastructure savings.

A well-designed site is paramount to the success of any mining or quarry operation. Well-planned infrastructure layouts help achieve maximum efficiencies and provide safe, practical work sites for your employees.

AIL International offers a wide variety of products and expertise to help you create safe, efficient mine sites for less.

Our technical sales team is poised to work with you through every phase of your project and, with numerous sales offices, manufacturing plants and distribution yards around the world, we can deliver your infrastructure project on time and on budget.

A sampling of our product applications is on the reverse. ▶

Save time and money with ALL's turn-key solutions.

Whatever your needs, our in-house engineering team will provide solutions that ship economically to remote sites and assemble quickly with light equipment — even in harsh climates like deserts or the Arctic.

Heavy Haul Road Arches

With its light weight and superior strength, our Ultra•Cor® and Super•Cor® deep corrugated steel is widely used for large engineered structures. Our Bolt-A-Plate® product is usually specified for medium-sized structures.

Rail Underpasses

Choose Ultra•Cor®, Super•Cor® or Bolt-A-Plate®, dependent on the size, specifications and load factors. We specialize in working with your team to limit or eliminate critical traffic interruption and site impacts.

Crusher and MSE Retaining Walls

Ideal for remote locations with available fill material, our MSE Retaining Wall Systems provide easy, on-site construction solutions for ramp and wall structures without the need for time consuming concrete.

Mine Portals

Specify Ultra•Cor or Super•Cor® for larger applications and Bolt-A-Plate® for mid-size. Each offer a wide variety of shapes and sizes to suit virtually any site requirement.

Stockpile and Reclaim Tunnels

For lightweight, strong and easy-to-install solutions, choose heavy duty Ultra•Cor® or Super•Cor® for large tunnel applications and Bolt-A-Plate® for medium ones.

Bridges and Abutments

Our Prefabricated Bridges come in a variety of widths and spans to handle heavy mining vehicles. Our MSE Wall and Bolt-A-Bin® Systems create cost-effective on-site abutments

Mine Shafts and Vent Raises

THE EDGE Four-Flange Structural Liner is ideal for creating underground structures such as mine shafts, ventilation raises and escape ways.

Reclaim Tunnels

According to required size and specification, reclaim tunnels can be made from various shape profiles in Super•Cor® or Bolt-A-Plate®.

Packaged Solutions

AIL structures can integrate easily with other mining equipment such as conveyors, crushers and concrete infrastructure. Ask your AIL MINING Representative for details.

Other product applications include Utiladors, Safety Barriers, Geotextiles and more.
