Making a Healthier Planet

The AIL Group is committed to achieving net zero emissions by 2050 and being a market leader in low-carbon solutions that support biodiversity.

- ▶ We have a “Net Zero by 2050” target. We measure key parts of our Scope 1, 2 and 3 emissions, and have set interim milestone emission targets.
- ▶ We have added on-site solar generation, improved building envelope energy efficiency and are working with our supply-chain partners and customers to lower carbon footprints.

NET ZERO BY
2050 ✓

Over 1,000 solar panels and counting: Our on-site renewable energy production decreases our reliance on the power grid.

- ▶ Offering low-carbon footprint solutions which are supported by third-party-reviewed environmental product declarations and life cycle assessments.
- ▶ Utilizing a high amount of reusable and recyclable materials.
- ▶ Understanding and improving life-cycle costs.
- ▶ Reducing negative biodiversity impacts during construction and service, and regenerating the environment, where possible.

Low-carbon solutions: This Ultra-Cor overpass near St. John’s, NL, has a lower life-cycle carbon footprint compared to a concrete beam bridge solution.

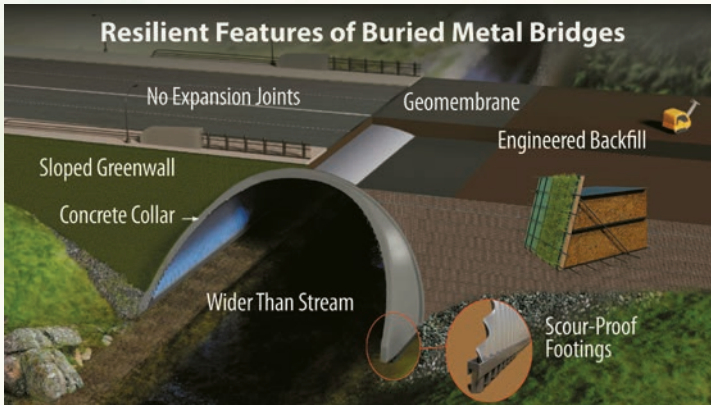

Supporting wildlife connectivity: The Bow Valley Gap Wildlife Overpass is expected to increase wildlife connectivity in the Yellowstone-to-Yukon corridor and dramatically reduce wildlife-vehicle collisions.

An AIL Geotextile Reinforced Soil (GRS) Bridge replaces suspended culverts and restores fish passage on an Alberta creek.

Connecting Communities

We take a leadership role in keeping communities connected with easy-to-install, resilient solutions that will serve for many decades.

Resilience to climate change: Offering extreme-event features to reduce climate change flood and debris risks such as larger spans, geotextile reinforced backfill, scour protection, greater vertical clearances and more.

- ▶ Providing solutions that are easy to install with local crews and lighter-weight equipment.
- ▶ Offering accelerated bridge construction solutions that reduce traffic disruption.
- ▶ Optimizing the use of local materials.
- ▶ Designing low-maintenance infrastructure solutions.
- ▶ Designing solutions to increase user safety.

Keeping traffic running: Staged construction with temporary MSE walls enable continuous traffic flow throughout construction.

Emergency solution: This large replacement culvert was manufactured and delivered within 24 hours to replace a Cape Breton washout.

Emergency solution: This replacement bridge was delivered to a remote site in Nova Scotia within five days of order.

Investing in Employees & Communities

We have progressive programs in place in support of both our employees and our communities.

- ▶ Creating a culture of diversity, equity and inclusion.
- ▶ Promoting a culture where everyone returns home safe and healthy.
- ▶ Offering integrated health and wellness initiatives.
- ▶ Our Family Education Grants support our employees' next generation.
- ▶ Recognizing potential and investing in our employees.

Engaging with education: We do this through scholarships, co-op placements, grad students, research projects and more.

Supporting our communities: We are proud to support our local communities in a variety of ways.
